Fire & Safety Solutions Product Linecard

Spartan Controls Fire & Safety Solutions is focused on protecting people and plant assets. Leveraging technology and expertise, we deliver effective fire and gas detection, IP video monitoring and emergency warning systems that **minimize operating costs, improve reliability and increase overall plant safety.**

Spartan provides:

- Solutions for the detection of toxic or combustible gases and fires
- Horns, strobes and complete public address/general alarm systems to alert employees to problems such as gas leaks, fire or other emergencies
- Industrial IP video and thermal camera systems to allow operators to observe facilities, remote sites, gates, fences and operations.

Spartan's unrivaled products, knowledge and service capabilities ensure our customers receive the best solutions in fire and safety technology.

Detect: Fire & Gas Detection Systems

Boreal Laser Inc.

Boreal Laser Inc. has been a trusted developer and manufacturer of tunable laser diode-based gas detection systems for toxic and combustible hazards since 1998. Boreal's equipment is long lived and does not require calibration or sensor replacement.

Det-Tronics

Det-Tronics is the global leader in fire and gas safety systems, providing premium flame and gas detection and hazard mitigation systems for high-risk processes and industrial operations.

Alert: Industrial Signaling and Communications

Federal Signal

From warning lights to sirens and strobes, no one puts their name on more industrial audible and visual signaling devices and communication systems than Federal Signal.

Federal Signal offers a wide range of products – from hazardous/general location horns and beacons to full site-wide evacuation public address and general alarm (PA/GA) systems.

Monitor: Location Awareness Solutions and Industrial Video Systems

Location Awareness

Emerson's Location Awareness technology could help reduce more than 70 percent of common personnel-recordable incidents. Used for safety mustering and man-down events, Location Awareness gives managers a snapshot of employee locations through rechargeable wearable tags that communicate over a WirelessHART network.

FLIR

FLIR is the global leader in designing and manufacturing thermal imaging infrared cameras used for process control, safety and security applications.

Osperity

Osperity offers a web-based intelligent visual monitoring platform that delivers efficient access to assets and activity from across your operations. Applications include:

- Remote well site or compressor station monitoring
- Truck terminal applications
- Security for unmanned facilities
- And more...

Pelco

Pelco is a world leader in the development of video surveillance and security solutions that give operators situational awareness, allowing them to make better decisions that affect the safety of their co-workers and facilities in real time.
