

PIC Specialty Tools

| | |
|---|--|
|  | <p>Hardy Portable Vibration Shakers</p> <p>Hardy's portable vibration shakers are designed to be used in the field or shop to verify the performance of vibration transducers, connectors, cabling, instruments or permanently installed condition monitoring systems.</p> |
|  | <p>Metrix VIBRA-CHECK Vibration Meter</p> <p>The economical and compact VIBRA-CHECK™ Vibration Meter is an ideal tool for obtaining spot measurements of machinery vibration. Three measurements are possible: displacement, velocity, and acceleration modes allow a user to perform basic vibration analysis.</p> |
|  | <p>Metrix Impact Calibration Meter</p> <p>This Impact Meter is designed for quick check or adjustment of Metrix Impact transmitters. This can be done on any operating machine or with the transmitter removed.</p> |
|  | <p>ECOM Emission Analyzers</p> <p>ECOM, the leader in portable emission analyzers, offers a wide range of instruments for the semicontinuous measurement of exhaust from fossil fuel fired combustion sources.</p> |
|  | <p>Monarch Pocket Tachometer</p> <p>The compact and versatile Pocket Tach 99 is ideally suited for non-contact, contact and linear speed measurements.</p> |
|  | <p>Spark Plug Viewer</p> <p>Read plugs quickly and accurately with this lighted spark plug viewer. This tool magnifies the spark plug 10X for a sharper look at any spark plug.</p> |

| | |
|---|---|
|  | <p>AccuTek III ® Ignition Analyzer</p> <p>The AccuTek III provides you with a full range of diagnostic features. This handheld, battery-operated analyzer is ideal in diagnosing problems in solid state ignition modules, ignition generators, coils, shielded and unshielded ignition harnesses, and ignition powered instrumentation.</p> |
|  | <p>Spark Plug Hole Conditioning Tool</p> <p>Use this hole conditioning tool to clean cylinder threads and gasket seats in one simple operation.</p> |
|  | <p>Timing Light</p> <p>The original battery powered timing light, built with quality to last. There is no need to connect to a 12 volt battery for power, as this unit is powered by two “D” cell flashlight batteries. The unit is built with 20 feet of cable. This is a great tool for timing industrial gas engines.</p> |
|  | <p>Twist A Gap Kit</p> <p>This kit allows you to easily spread the four electrodes on type N spark plugs and accurately close the electrodes to the desired gap.</p> |
|  | <p>Spark Plug Socket</p> <p>For the first time, high quality sockets that will really hold a heavy industrial spark plug while being lowered down a deep spark plug well. These sockets can be used with any manufacturer’s spark plug. 7/8” available in 1/2” drive. 1”, 13/16”, 15/16”, 7/8” available in 3/8” drive.</p> |
|  | <p>Digital Manometer</p> <p>Manometers are ideal for field calibration, monitoring or trouble shooting. This handy instrument measures positive, negative or differential pressures of air and natural gases. Its simple operation and easy-to-read digital display make it an indispensable test instrument.</p> |
