- Monitor 4 AC Inputs
- Monitor 4 Dry-Contact Inputs
- Battery Back-Up
- Service Button, Test Message
- 24 Hour Heartbeat Status
- Low Monthly Service Charge
- NEMA 4 Housing

When the alarm sounds you need to be informed immediately. You need a device that can intelligently tell you the exact location, exact time and exact reason for the shutdown. You need a device that works in today's technology 24 hours a day, 7 days a week and not be a financial burden. The **inTouch Wireless Monitoring System** was developed to communicate directly with up to ten (10) Flame-Monitor or MicroM flame safeguard controls. In the event of a lockout the information is transmitted to you through the nationwide cellular network, AMPS (Advanced Mobile Phone System), eliminating the need for costly telephone lines. And because **inTouch** is a cellular device, installation time is greatly reduced.

Message delivery methods include pagers (alphanumeric, numeric), fax, e-mail, PCS, or telephone (voice delivery), making the **inTouch** system easily accessible and therefore reducing downtime. Every 24 hours the **inTouch** system also sends a heartbeat of all monitored equipment to the central server. Each heartbeat contains specific run time information such as burner hours, burner cycles, system hours and total lockouts. This information, along with the last 90 days of history, is easily accessed from the internet using your personal **inTouch** account.

If your application is critical or your customers demand service you need to stay **inTouch**.

Expanding the Universe
of Fireeye Controls...
...Wirelessly

A low monthly service fee is charged for each inTouch installation and includes:

- 24 hour / 7 day on-line monitoring
- Nightly heartbeat messages
- Unlimited web access for device configuration and inquiries

inTouch Value to Owners

Minimize Equipment Downtime

- Shorten Alarm / Response / Repair Cycle
- Allows Predictive Maintenance

Operate More Efficiently

- Allows Operations Staff Flexibility
- Cost of Monitoring Reduced
- Better Service Decisions

Market Differentiator

- Enable Comfort Guarantee
- Proactive Response
- Reduced Complaints

inTouch Value to Contractors

Manpower Shortage / Utilization

- Replace Inspections with Monitoring
- Operate More Efficiently
 - Right Technician for the Job
 - Service Callbacks Reduced
- Better Information about Alarm
 - Reduce Time Spent on Job
 - Reduce Overtime

Retain Customers & Grow Sales

- Differentiated Offering Grow Sales, Grow Profit
- Lower Cost of Customer Turnover
 - Add on Sales from Customers Retained
- Referral Business
- Upgrade Customer Base

**Connect Up to 10 Flame-Monitors and/or MicroM Controls
PLUS 4 Dry Contact AND 4 A/C Inputs**
