Revolutionizing Display Technology

We exist to conquer complexity and are relentless in our pursuit of improved user experiences and performance-enhancing technology. With best-in-class viewability and a wide range of sizes, options and power, there's a PowerView display that will be a perfect fit for your application.

Challenging Convention to Change The Game

We've learned a lot designing displays for over a decade. We immerse ourselves in our customers' world to reveal unknowns, question assumptions and embrace new perspectives. Our unmatched commitment to testing and quality ensures we deliver performance-enhancing technology and components that thrive in the rugged environments you work and play in every day. Connectivity is built in with options for Bluetooth, Ethernet, Wi-Fi and Infotainment. Faster processors, more memory, rich customization and an intuitive interface are all part of the complete solution we deliver.

Powerful Software Platform

Design and program for Enovation Controls' displays using PowerVision Configuration Studio[®] software. This robust tool provides OEMs with complete customization over the user interface and allows for scripting to change the look and feel of screens, customize parameters, edit troubleshooting or add brand identity.

Your Partner for Programming

Don't have programming capabilities? Let us be your experts. Our in-house design and programming teams can help you build your dream display. With integrated automotive-like technology, Enovation Controls' design experts give your customers the ultimate interface experience with total machine control.
