

MEASUREMENT – FLEXIM

Installed in Minutes, Not Days

A clamp-on solutions for a 30" line – no shutdown and no delays

CHALLENGE

Installing a flowmeter on a large 30" water line posed a challenge. The customer wanted to avoid waiting for a scheduled shutdown, which would require coordination with contractors, mechanical staff, and planners.

SOLUTION

A Flexim clamp-on ultrasonic flowmeter was offered, allowing installation directly on the outside of the pipe, no shutdown or additional hardware required.

VALUE

Spool pieces + downtime + manpower = \$15,000 total cost savings
