Maximize Terminal Efficiency with TerminalBOSS

In today's competitive bulk commodity landscape, terminal operators face numerous operational challenges that directly impact their bottom line. Manual ticketing creates bottlenecks, disconnected systems waste valuable staff time, safety procedures lack consistency, and inventory inaccuracies lead to revenue leakage.

The Complete Terminal Management Solution

TerminalBOSS is a cloud-enabled Terminal Management System that seamlessly automates custody-transfer workflows from gate-in to invoice. Our integrated platform delivers at least 25% increase in operational efficiency by eliminating manual administrative tasks while enhancing safety and compliance.

Increase Throughput
Handle more volume without adding headcount

Eliminate Errors
Avoid costly manual mistakes and audit penalties

Real–Time Visibility
Deliver critical insights to all stakeholders

Comprehensive Features for Modern Terminal Loading/Unloading Operations

Inventory Management
Real-time dashboards and engineered measurement

Electronic Ticketing
API-compliant volume and mass calculations

Safety Controls
Driver authentication, interlocks, and fire-gas detection

Enterprise Integration
Seamless data integration to ERPs, FDCs, and ETRMs via VantEdge Wheelhouse

Custom Workflows
A utomate your operations using custom workflows
