

Upgrade your existing **TruckVue™/RailVue™** terminal operations with the industry's most comprehensive logistics platform. **TruckVue™/RailVue™** Powered by **TerminalBOSS™**, Delivering unprecedented visibility, automation, and control across your entire commodity logistics network.

Complete Integration

Unified platform connecting terminal management, truck scheduling, and rail services

Real-Time Visibility

A single, unified platform delivering real-time visibility into trades, contracts, movements, operations, and inventory to improve execution efficiency, reduce enterprise risk, and support financial discipline.

Enhanced Accuracy

High-precision measurement instrumentation ensures custody transfer excellence.

Why Upgrade Now?

The partnership between Spartan Controls and VantEdge brings together best-in-class measurement technology with cutting-edge cloud logistics. You gain lifecycle support, reduced operational complexity, and a future-proof solution that scales with your business.

Built for Your Success

Our integrated approach eliminates data silos, automates manual processes, and reduces costly errors. From driver workflows to customizable dashboards, every persona in your organization benefits from streamlined operations and actionable insights.

Ready to revolutionize your terminal operations?

Accurate Measurement

Micro Motion Coriolis flow meters, Rosemount pressure and temperature sensors, and Phase Dynamics / Drexelbrook water cut analyzers deliver precision custody transfer.

Wheelhouse Platform

Cloud-enabled centralized visibility across all terminals with Terminal Sync integration for seamless data flow.

Comprehensive Support

Knowledgeable field service teams, remote troubleshooting, and full lifecycle support de-risk your investment.

Discovery

We assess your current operations and identify gaps or incompatibilities that may be limiting performance or scalability.

Design

Built on decades of domain expertise, two industry-leading platforms are combined to deliver a best-in-class, enterprise-grade architecture designed for scale, reliability, and operational control.

Implementation

Commissioned within weeks, enabling rapid deployment, minimal operational disruption, and accelerated time-to-value.

Optimization

A framework that combines proactive support, performance tuning, and iterative enhancements to future-proof operations and maximize long-term ROI

TruckVue™/RailVue™ Powered by **TerminalBOSS™** eliminates driver confusion, centralizes administration, and provides enterprise visibility—all in one integrated platform.”

By upgrading **TruckVue™/RailVue™** to be powered by **TerminalBOSS™**, customers typically achieve payback within 6-9 months, with realized returns exceeding 100%.
