Product Portfolio
Automation | Valves | Measurement | Process Control
Plant Automation

The systems and software that provide the decision integrity to run your operation.

Process Control Systems, Safety Instrumented Systems, Asset Management

Valves & Actuation

Control: Rotary, Sliding Stem, Solenoid, Severe Service, Digital Valve Controllers, Instrumentation and Accessories

Isolate: Ball, Globe, Check, Knife Gate, Diaphragm, Butterfly, Double Block & Bleed, Hydraulic Control, Gas Shutoff, Dampers & Louvres, Pinch

On-off Actuation: Pneumatic, Hydraulic, Electric Actuator Technology

Regulate: Process Gas, Tank Blanketing, Liquids, Steam, Natural Gas

Protect: Pressure Relief, Tank Management, Rupture Disks, Surge Relief, Liquid Control

Measurement Instrumentation

The broadest range of measurement and analytical technologies for process clarity and insight.

Pressure, Temperature, Level, Flow, Density, Viscosity, Liquid Analysis, Gas & Emissions Analysis, Wireless, Fluid Transportation Solutions, Corrosion, Tank Gauging, Marine Applications
SCADA, Flow Computers & RTUs

Best in class SCADA, operations management and field automation solutions.

SCADA software, Industrial IOT, Flow Computers & Remote Terminal Units (RTUs), Low-powered Chemical Injection Solutions, Wireless Solutions

Engine & Compression Solutions

Ensure critical rotating and reciprocating machinery health and reliability solutions.

Engine and Compressor Control Panels, Air-fuel Ratio Systems, Vent Capture, and Emissions Reduction Solutions

Fire & Safety Solutions

Solutions for the detection of toxic or combustible gases and fires in hazardous areas and heavy industrial applications.

Power & Drives Solutions

Low/Medium Voltage Variable Frequency Drives (VFDs), Low/Medium Voltage Motors, Low Voltage Motor Control Centres (MCCs), Low Voltage Switchgear

Automation Packaging

Custom pneumatic, electronic, electrical, and hazardous location control panels and assemblies

- Buildings and skids
- CSA ABSA and testing
- DCS marshalling & safety systems
- Emerson DeltaV & DeltaV SIS
- Telecom, fiber-optics & server cabinets
- Staging & testing services
- Fire & security enclosures
- Junction boxes & power distribution
- Oil & gas field service rigs and trucks
- Pneumatic & analytical
- Programmable Logic Controllers
- Remote Terminal Units
- Truck unload solutions
- Winterization enclosures

Services

Product Support Services
Our experts are available 24/7 to service and support Emerson and Spartan products and systems.

Emerson Lifecycle Services
Talent and technology to keep your process online including:
- Site Services
- Plant Turnaround
- Outage Management
- Parts and Repair Services

Value Added Services
Service and repair for all your products including:
- Onsite Repair Services
- ABSA Certified Steam Testing Services
- Master Meter Proving Stand
- Field Services
- Factory Authorized Services

Education and Training
Spartan’s Education Centre operates as an Emerson certified training facility, offering the widest variety of learning experiences in the process controls market. Training support from Emerson and other leading principals lets us offer industry-leading expertise on complex process control topics.

11 LOCATIONS ACROSS WESTERN CANADA TO SERVE AND SUPPORT OUR CUSTOMERS

British Columbia
Burnaby +1 604 422 3700 • Fort St. John +1 250 785 0285 • Prince George +1 250 960 9765

Alberta
Calgary +1 403 207 0700 • Edmonton +1 780 468 5463 • Fort McMurray +1 780 790 0440 • Grande Prairie +1 780 539 1161 • Whitecourt +1 780 778 5445

Saskatchewan
Midale +1 306 458 2223 • Regina +1 306 721 6925 • Saskatoon +1 306 934 3484
